Test Description :

A Bichard7 Regression Test verifying existing Offence behaviour and those changes to the Bichard7 solution brought about as part of RCD554.Court Hearing Results are received Adjourning all Offences after a Verdict has already been reached (i.e. Adjournment Post Judgement). However, at this point the PNC is unaware of the Verdict that has been reached and therefore holds no Adjudication for any of the Offences on the PNC.

The Bichard7 solution recognises the mismatch of Verdicts details between the Court and the PNC and generates an "Inconsistent Result" Exception.  
No PNC update is made.
