## Test Description :

A Bichard7 Regression Test verifying multiple CCR Group processing where there are multiple instances of the same Offence across more than 1x CCR Group. The BR7 solution is not able to uniquely identify a match between PNC Offence and Court Offence in order to provide an automated update (since the same Offence exists in more than 1 x CCR Group) and so instead an Exception is created for manual resolution. NO PNC Update is generated. Pre Update Triggers are also created.

## Steps

1	<p>Pre-conditions for this test have been met:</p> <p>New Case Message for this test is part of the PNC Host9 data baseline (No PNC action needed)</p>	<p>All Pre-conditions as required in order to execute this test have been met</p>
2	<p>Verify that the following properties files and associated property values have been configured as part of the BR7 solution:</p> <p>applicationResources.properties new properties/values:</p> <ul style="list-style-type: none"> <li>br7.error.H0100332=Offences match more than one CCR</li> <li>br7.error.H0200124=The PNC cannot be updated automatically because there are adjudications together with existing final results. It will have to be done manually.</li> </ul>	<p>Properties file and new/revised associated property values have been configured as specified.</p>
3	<p>Court Resulting Simulation:</p> <p>Inject SPI Resulted Case Message via Test Console</p>	<p>SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console</p>
4	<p>Verify that the following Exception record has been created on the Exception Portal *</p> <p>Exception ID: H0100332 (x 3)</p> <p>Exception Text: Offences match more than one CCR **</p> <ul style="list-style-type: none"> <li>for info ASN = 1200000000000020006T</li> </ul> <p>** In this instance the BR7 solution does not know which CCR Group the Results should be assigned to since the same Offence exists in more than 1 x CCR Group, hence the need to generate an Exception for manual resolution.</p>	<p>Exception record has been created as specified on the Exception Portal for the Court Hearing Results</p>
5	<p>Verify that PRE UPDATE Trigger records have been created on the Exception Portal * with the following values:</p> <ul style="list-style-type: none"> <li>Trigger ID = TRPR0006 (x 1 Case-level Trigger)</li> <li>Trigger Message = Defendant imprisoned - update custody history</li> <li>for info ASN = 1200000000000020006T</li> </ul>	<p>Trigger records have been created on the Exception Portal with the values defined.</p>
6	<p>Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has NOT been updated</p>	<p>Impending Prosecution Record on PNC has NOT been updated with Court Hearing Results passed on from the Bichard 7 solution.</p>
