Test Description :

A Bichard7 Regression Test which verifies the handling of Civil Cases by the Bichard7 solution.
Civil Case Court Hearing results are sent through the CJSE and onto Bichard7.
Hearing Outcome XML is successfully created based on ResultedCaseMessage contents.
The Offences are recognised as 2x identical Civil Offences that should generate the Civil Proceedings Trigger based on Offence Code and "Granted" Result Text combination.
A single Civil Proceedings Trigger is generated since the Trigger is a Case-level Trigger.
No Exception is raised and no PNC Update is generated.
