Test Description :

A Bichard7 Regression Test verifying Ignored Offences handling where the Offences are present on the PNC. Specifically:- Message 1: Ignored Offence 1 = Judgement with Final Result (DISARR)

PNC Updates are generated and the Court Hearing Results are successfully added automatically onto the PNC. Pre Update Triggers are also created and resolved via the Portal.

- Message 2: Ignored Offence 1 (same Offence as Message 1 but different final results) = Judgement with Final Result

An Exception is created since there are incompatibilities between the results on the PNC and those received from Court, i.e. existing Final Results on the PNC and an Adjudication received from Court.
