Test Description :

A Bichard7 Regression Test verifying Offences Taken Into Consideration handling where they are added as part of a Sentence Hearing. Court Hearing results are sent through the CJSE and onto Bichard7 containing details of Offences Taken Into Consideration (Result Code "3118"). Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution. PNC Update is generated and the Court Hearing Results are successfully added automatically onto the PNC. Since the Offences Taken Into Consideration cannot be added to the PNC (since the update to the PNC at this point is via a SENDEF PNC Message Type) a POST Update Trigger identifying the need for this to be manually added is also successfully created on the Portal.
