Test Description :

A Bichard7 Regression Test verifying Offences Added in Court behaviour as follows: Current PNC Status = Adjudication exists

Existing Offences are resulted as: Sentence

An Offence Added in Court is resulted as: Adjournment With Judgement

For a single CCR Group it is not possible to combine the SENDEF and NEWREM and DISARR operations and so an Exception is generated to highlight the need for a manual resolution.

No Triggers are generated either.

Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation (2 x Messages): Inject SPI Resulted Case Messages via Test Console sequentially (Part 1 followed by Part 2)	SPI Resulted Case Messages are successfully injected into the CJSE - check via Test Console
3	Verify that the following Exception record has been created on the Exception Portal * HO Exception: HO200113 Exception Description: The PNC cannot be updated automatically because there are new remands together with sentencing. It will have to be done manually. * ASN = 1101ZD0100000445115E	The Exception record has been created on the Exception Portal as specified. For a single CCR Group it is not possible to combine the SENDEF and NEWREM and DISARR operations.
4	Verify that NO Trigger record has been created on the Exception Portal * Trigger ID = TRPS0011 x 1 Trigger Message = Offence added at court - add to PNC • ASN = 1101ZD0100000445115E	NO Trigger record has been created on the Exception Portal.
5	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has NOT been updated.	Impending Prosecution Record on PNC has NOT been updated with Court Hearing Results passed on from the Bichard 7 solution. For a single CCR Group it is not possible to combine the SENDEF and NEWREM and DISARR operations.
