Test Case Description

Test ID : 202 BR7 R5.1-RCD422-Breach of Community Order-Revoked-Resentenced

Test Phase :

· System Integration Testing

Test Type :

· Regression Testing

Test Items verified :

· Bichard7 application
· Message Brokering
· Portal Services (Strategic Portal Framework)
· Identity & Access Services (Tivoli)

Test Design Techniques used :

· Specification-based (black box) techniques
· Experience-based techniques - exploratory Testing
· Business Process Testing

External Entities (to which Bichard7 interfaces) verified :

· (2.2.2) EII's forwarding of Court Hearing Result messages received from LIBRA
· (2.2.4) NSPIS-PNC Interface Implementation in PNC
· (2.2.6) User's web browser

Business Information Flows (those that cross the System boundary) verified :

· (2.3.2) Magistrates Court Hearing Concluded
· (2.3.5) Arrest/Summons-based Enquiry Request
· (2.3.6) Arrest/Summons-based Enquiry Response
· (2.3.7) Arrest/Summons-based Update (Message) Request
· (2.3.8) Arrest/Summons-based Update (Message) Response
· (2.3.10) Court Result or PNC Update Exception/Trigger List Request
· (2.3.11) Court Result or PNC Update Exception/Trigger List Response
· (2.3.12) Court Result or PNC Update Exception/Trigger Request
· (2.3.13) Court Result or PNC Update Exception/Trigger Response

System Control Flows (those that cross the System boundary) verified :

· N/A

Business Scenarios verified :

3042 (resulting from original conviction of) and Subvar Breach of Community Order - Revoked (Revoked and Re-sentenced)

Documents Referenced :

· BR7TEST001 Bichard 7 Test Approach v1.3.doc· Release 3.2 UAT Prep v0.97.doc **

- Refer to most recent incarnation/version of this document ** These documents contained the original and earlier incarnations of this Business Scenario which have all been superseded by "Bichard7 Business Scenarios v5.6.doc"

Test Procedure originally based on :

· N/A

Pre-requisites :

- Release Note has been provided by IBM
- BR7 Release has been deployed as per the 'Release Note for Bichard 7 vn.n.doc'
- Tests ,(smoke test 001) & (smoke test 002) have been successfully run to completion

Historical :

N/A

Test Description :

A Bichard7 Regression Test verifying Breach Offence handling where a Further Offence is charged and Trigger generation.Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution.

The Defendant is given a Custodial Sentence for the further Offence. The original Sentence is Revoked and Resentenced and the Defendant is Sentenced to an additional Custodial Sentence to run concurrently with the further Offence.

PNC Update is generated and the Court Hearing Results are successfully and automatically added onto the PNC (including the Breach Offence Added In Court).

Pre and Post Update Triggers are also created on the Portal.

Steps		
1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation - 1st Court Hearing Results: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
3	Verify that NO record has been created on the Exception Portal * <ul style="list-style-type: none">for info ASN = 1101VK0100000376289U	NO record has been created on the Exception Portal.
4	Verify that NO Trigger record has been created on the Exception Portal * <ul style="list-style-type: none">for info ASN = 1101VK0100000376289U	NO Trigger record has been created on the Exception Portal.
5	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated.	MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated.
6	Court Resulting Simulation - 2nd Court Hearing Results: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
7	Verify that NO Exception record has been created on the Portal * <ul style="list-style-type: none">for info ASN = 1101VK0100000376290V	NO Exception Record has been created on the Portal.
8	Verify that the following Trigger records have been created on the Exception Portal * with the following values: Trigger ID = TRPR0006 x 1 Trigger Message = Defendant imprisoned - update custody history Trigger ID = TRPR0020 x 2 Trigger Message = Update original case with conviction and sentence details Trigger ID = TRPRS010 Trigger Message = Offence added to the PNC - Update M0	Trigger records have been created on the Exception Portal with the values defined.

Screen/Offence Location/Update 3042

- for info ASN = 1101VK0100000376290V

9

Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated correctly.

MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated correctly.

10

Manual PNC Update

Step over and pass for magistrates regression tests or if Steve Geen (MET) not available

11

The User should manually update the PNC as follows:

- With the correct disposals (adding a 3042 disposal to reference the original conviction)
- With the disposal 1029 in the result of the original offence
- The original offence will need to be manually SUBVAR'd (since this is the only way to override the existing results already on the PNC)

Manual steps to update the PNC have been included here for completeness and to tie the Test Procedure with the Business Scenario. Actual manual PNC steps are therefore not required as part of this Test Procedure.

12

Mark Triggers as Complete
B7 portal Action

13

The User should mark all Triggers as 'Complete' once the updates outside of the capabilities of the Bichard7 solution have been done.

All Triggers associated to the Case are marked as 'Complete'.
