Test Description :

A Bichard7 Regression Test verifying Court Results automation (Adjournment with Judgement & Sentence) - where Offences have already been Dismissed and are no longer being reported from Libra - and Trigger generation. A number of Court Hearing results are sent through the CJSE and onto Bichard7 for the same case which contains Dismissed/Withdrawn Offences. The Result Classes for the Offences move progressively from 'Adjournment with Judgement' to 'Sentence'.

For each set of results a Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution.

PNC Update is generated and the Court Hearing Results are successfully added automatically onto the PNC.

Pre Update Trigger is also successfully created on the Portal.
