Test Description :

A Bichard7 Regression Test which verifies the handling of Civil Cases by the Bichard7 solution. Civil Case Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents. All Offences are recognised as those that should be ignored (Offence Category = 'B7') and the entire Case is (purposely) ignored. No Civil Proceedings Trigger is generated and no Exception is raised.
