Test Description :

A Bichard7 Regression Test verifying Offences Added in Court behaviour and those changes to the Bichard7 solution brought about as part of RCD554. Offences Added In Court should not give rise to 'Inconsistent Result' exceptions. The solution should not attempt to add Offences classified as "Added In Court" with these Result Classes ("Adjournment Post Judgement" or "Sentence") and should raise Trigger TRPS0011 instead (in order that the remainder of the Results from Court may be automated). This Test will verify that an Offence Added In Court with a Result Class of "Adjournment Post Judgement" where the PNC has no Adjudication/Disposal will no longer generate an Exception and instead:

- Generate a TRPS0011 Trigger

- Automate the other Results received from Court

Court Hearing Results are received Adjourning all Offences after a Verdict has already been reached (i.e. Adjournment Post Judgement). Offences are Added in Court at the same Hearing and are also resulted as "Adjournment Post Judgement".

The Bichard7 solution recognises the Offences Added In Court and instead of generating an "Inconsistent Result" Exception:

- Generates Post Update Triggers

- Automates the remainder of the Results onto the PNC

The PNC is successfully updated with Court Hearing Results and Triggers are also generated for the Offences Added In Court that cannot be automatically added to the PNC.

## Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation - 1st Court Hearing - Adjournment With Judgement: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
3	Verify that NO Exception record has been created on the Exception Portal* <ul style="list-style-type: none"><li>ASN = 1201ZD0100000445746P</li></ul>	NO Exception record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts to PNC
4	Verify that NO Trigger record has been created on the Exception Portal* <ul style="list-style-type: none"><li>ASN = 1201ZD0100000445746P</li></ul>	NO Trigger record has been created on the Exception Portal.
5	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been correctly updated:  Offence 1: REMAND ON UNCONDITIONAL BAIL 26/10/11 Offence 2: REMAND ON UNCONDITIONAL BAIL 26/10/11 1x Remand Added	Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 solution. PNC Print reflects the results sent from the B7 solution.
6	Court Resulting Simulation - 2nd Court Hearing - Adjournment Post Judgement: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
7	Verify that NO Exception record has been created on the Exception Portal* <ul style="list-style-type: none"><li>ASN = 1201ZD0100000445746P</li></ul> (No "Inconsistence Result" Exception has been raised for the Offences Added In Court with a Result Class of "Adjournment Post Judgement")	NO Exception record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts to PNC
8	Verify that Trigger records have been created on the Exception Portal with the following values: *	Trigger records have been created on the Exception Portal with the values defined.

Trigger ID = TRPS0011 x2  
Trigger Message = Offence added at court - add to PNC

- ASN = 1201ZD0100000445746P
