Test Procedure originally based on :

- N/A

Pre-requisites :

- Tests (smoke test 000), (smoke test 001) & (smoke test 002) have been successfully run to completion

Historical :

Previously titled: "029 R3.2\_BR7\_3050\_With Date & Duration".

Revised as a configuration-only change (whilst BR7 R5.6 was in production) following a Libra fix to ensure that Result Code 3050 always correctly appears as the ancillary result and not the substantive result.

Refer to QC Attachments tab for previous incarnation of this Test.

Original Test Description was:

"A Bichard7 Regression Test verifying Result Code 3050 handling and automation of results where the 3050 Result is received with specific Date and Duration values (i.e. verification of the 'No Disposal Date List' and the 'No Disposal Duration List').

Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents. Exception is created, displayed and resolved on the Portal via data update and record resubmission. PNC Exception Update is generated and the Court Hearing Results with portal-added values (Offence Sequence Numbers) are successfully added onto the PNC. PRE Trigger is also successfully created on the Portal.

The update to the PNC creates a resultText of the format "Disqualification from driving reduced if course completed" with NO Date and NO Duration values despite this information being present in the Court Hearing Results."

Revised as part of Release 5.7. Interim Disqualification Court Hearing Results added.

Test Description :

A Bichard7 Regression Test verifying Driver Disqualification handling and automation of results where only a Duration value is received from Court.

A 1st set of (Adjournment with Judgement) are sent through the CJSE and onto Bichard7.

A PNC Update is generated and the results from Court (Interim Disqualification) are successfully and automatically added onto the PNC.

A PRE Trigger is also successfully created on the Portal.

A 2nd set of (Sentence) Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents. The substantive result received (3071 - Disqualified from Driving - Discretionary) contains a Duration value. In addition an ancillary result (3050 - Disqualification from Driving Reduced if Course Completed) is also received.

A PNC Update is generated and the results from Court are successfully and automatically added onto the PNC.

A PRE Trigger is also successfully created on the Portal.
