Test Case Description

Test Procedure ID : 196 BR7-R5.4-RCD548-R5.3.2-RCD556-Breach Offence with Re-sentence for original offence and adjourn

Test Phase :

· System Integration Testing

Test Type :

· Regression Testing

Test Items verified :

- Bichard7 application
- Message Brokering
- Portal Services (Strategic Portal Framework)
- Identity & Access Services (Tivoli)

Test Design Techniques used :

- Specification-based (black box) techniques
- Experience-based techniques - exploratory Testing
- Business Process Testing

External Entities (to which Bichard7 interfaces) verified :

- (2.2.2) EII's forwarding of Court Hearing Result messages received from LIBRA
- (2.2.4) NSPIS-PNC Interface Implementation in PNC
- (2.2.6) User's web browser

Business Information Flows (those that cross the System boundary) verified :

- (2.3.2) Magistrates Court Hearing Concluded
- (2.3.5) Arrest/Summons-based Enquiry Request
- (2.3.6) Arrest/Summons-based Enquiry Response
- (2.3.10) Court Result or PNC Update Exception/Trigger List Request
- (2.3.11) Court Result or PNC Update Exception/Trigger List Response
- (2.3.12) Court Result or PNC Update Exception/Trigger Request
- (2.3.13) Court Result or PNC Update Exception/Trigger Response

System Control Flows (those that cross the System boundary) verified :

· N/A

Business Scenarios verified :

· 5. Breach Offence with Re-sentence for original offence and adjournment

Documents Referenced :

- BR7TEST001 Bichard 7 Test Approach v1.3.doc- "Test scenarios 20502063 etc".doc
- MoJ ICT BR7 TTMNNN SIT Test Traceability Matrix-Bichard7 Release N.N *
- MoJ ICT Bichard7 SIT Regression Pack Coverage Matrix vN.NN *
- Refer to most recent incarnation/version of this document

Test Procedure originally based on :

· N/A

Pre-requisites :

- Release Note has been provided by IBM
- BR7 Release has been deployed as per the 'Release Note for Bichard 7 vn.n.doc'
- Tests , (smoke test 001) & (smoke test 002) have been successfully run to completion

Historical :

This Regression Test was originally taken from a Test created for BR7 Release 5.3.2; specifically - Test verified those changes brought about as part of RCD entry #556. This test verified 'Breach Offence with Re-sentence for original offence and adjournment' handling where no Verdict is sent from Libra in the Court Hearing Results. See the 'Attachments' tab for an extract of the original Test Procedure (the current incarnation of this Test Procedure was revised given that the functionality in R5.4 changed the BR7 behaviour for this Business Process).

Test Description :

A Bichard7 Regression Test verifying Result Class calculation and Breach scenario processing. Specifically: Court Hearing Results are received for a Breach Offence for which a Re-Sentencing of the original Offence is imposed and Sentencing is Adjourned to a Next Hearing.
 The Defendant Admits the Breach Offence.
 The Result Class for the New Breach Offence/Result is set to "Judgement With Final Result".
 The Result Class for the Offence providing details of the Next Hearing is set to "Adjournment Post Judgement".
 The New Breach Offence is Resulted as "Dealt with for Original Offence" and the solution recognises this as a Result that cannot be added to the PNC (i.e. it is a Stop Listed Result); the Offence therefore has no Results and an Exception is created for manual resolution on the Portal.
 Pre Update Triggers are also created on the Portal.

Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation - 1st Court Hearing Results: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
3	Verify that the following Exception record has been created on the Exception Portal * Exception ID: H0200212 Exception Description: Offence has no valid PNC results ** <ul style="list-style-type: none"> for info ASN = 1101ZD0100000415363Q** For this Test: Offence 1 contains Result Code 3501 only. This Result Code is in the Result Code Stop List and will not be sent to the PNC leaving this Offence without any results Offence 2 contains a single Offence with Offence Category VP. This Offence Category is in the Ignored Offence Categories List and the Offence and its results will not be included in any PNC update message. 	Exception record has been created on the Exception Portal.
4	Verify that the following Trigger records have been created on the Exception Portal * Trigger ID: TRPR0020 <ul style="list-style-type: none"> for info ASN = 1101ZD0100000415363Q 	Trigger record have been created on the Exception Portal.
5	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has NOT been updated.	MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has NOT been updated.
