Test Description :

A Bichard7 Regression Test verifying Ignored Offences handling (Ignored Offences with Recordable Results) where the Ignored Offence is present on the PNC and a Recordable Offence is Added In Court. Specifically:- Message 1: Offence 1 (Ignored Offence, Recordable Result) = Judgement With Final Result, Offence 2 Added In Court (Recordable Offence) = Judgement With Final Result
PNC Update is generated for Offence 1 and the Court Hearing Results are successfully and automatically added onto the PNC.
The 2nd Offence is added to the PNC.
Pre Update Triggers are created on the Portal - this includes a Trigger (TRPR0006) for the Recordable Results received against the Ignored Offence.
Post Update Triggers are created to identify the Offence Added In Court.
All Triggers are Resolved via the Portal.
