## Test Description :

A Bichard7 Regression Test verifying Court Results automation (Judgement with Final Result), updating the PNC with Result Text and Trigger generation. Court Hearing results are sent through the CJSE and onto Bichard7 for a number of Orders Results. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution. PNC Update is generated and the Court Hearing Results (Result Codes 1100,3041) are successfully added automatically onto the PNC which include specific updates to PNC Disposal Text. Pre Update Triggers are also successfully created on the Portal.
