## Test Description :

A Bichard7 Regression Test verifying Identical Offence Matching where Results received are identical except for a Stop List Result for one Offence. Specifically:- Offences 1 and 2 are identical and the Results received from Court are also identical with the only difference that 1 Offence has also been resulted with a Result which is in the Result Codes Stop List  
The Stop List Result is stripped out by the solution and since the Offences and their associated results are then seen as identical an update to the PNC is successfully generated.  
Pre Update Triggers are created on the Portal.
