Test Case Description

Test Procedure ID : 049 #191 – TRPS0008 Required for curfew Orders (1052) NOT TRPR0003

Test Phase :

- System Integration Testing

Test Type :

- Regression Testing

Test Items verified :

- Bichard7 application
- Message Brokering
- Portal Services (Strategic Portal Framework)
- Identity & Access Services (Tivoli)

Test Design Techniques used :

- Specification-based (black box) techniques

External Entities (to which Bichard7 interfaces) verified :

- (2.2.2) EI's forwarding of Court Hearing Result messages received from LIBRA
- (2.2.4) NSPIS-PNC Interface Implementation in PNC
- (2.2.6) User's web browser

Business Information Flows (those that cross the System boundary) verified :

- (2.3.2) Magistrates Court Hearing Concluded
- (2.3.5) Arrest/Summons-based Enquiry Request
- (2.3.6) Arrest/Summons-based Enquiry Response
- (2.3.7) Arrest/Summons-based Update (Message) Request
- (2.3.8) Arrest/Summons-based Update (Message) Response
- (2.3.10) Court Result or PNC Update Exception/Trigger List Request
- (2.3.11) Court Result or PNC Update Exception/Trigger List Response
- (2.3.12) Court Result or PNC Update Exception/Trigger Request
- (2.3.13) Court Result or PNC Update Exception/Trigger Response

System Control Flows (those that cross the System boundary) verified :

- N/A

Business Scenarios verified :

- Scenario TPS8: Curfew order details

- MoJ ICT Bichard7 SIT Regression Pack Coverage Matrix vN.NN *

- Refer to most recent incarnation/version of this document

Test Procedure originally based on :

- N/A

Pre-requisites :

- Tests (smoke test 000), (smoke test 001) & (smoke test 002) have been successfully run to completion

Historical :

· Updated following the removal (end-dating) of Result Code 1052 from document: "CJSE Result Codes v5.7.xls". The scenario now concentrates on Result Codes 1116 & 3105.

Test Description :

A Bichard7 Regression Test verifying Court Results automation (Judgement with Final Result), BA Result Code Qualifier handling (catering for an error in the way that Electronic Tagging results are received from Libra where the Electronic Tagging Qualifier is specified against the Result for an Order and not against the Result which specifies a Requirement) and Trigger generation. Court Hearing results are sent through the CJSE and onto Bichard7 containing Judgement and Final Result information which also includes Electronic Tagging (BA Qualifier). Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution. PNC Update is generated and the Court Hearing Results are successfully added automatically onto the PNC. PNC is verified to ensure Electronic Tagging details have been added correctly; in this case the Electronic Tagging will have been removed from the Result for the Order (1116) and added instead to the Result which specifies the Requirement (3105). Post Update Trigger is also successfully created on the Portal.

Access Management

FAT (Steria pre Prod)

RDP (From Orwell User Bastion): WS002 mmm.nnn.8.12

Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
3	Verify that NO record has been created on the Exception Portal *	NO record has been created on the Exception Portal .
4	Verify that the below Trigger has been created on the Exception Portal * Trigger ID = TRPS0008 Trigger Text = Enter details of curfew order	Trigger has been created on the Exception Portal .
5	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated as follows: <ul style="list-style-type: none"> The BA Qualifier (Electronic Tagging) will have been removed from the Result for the Order (1116 - Community Order) and added instead to the Result which specifies the Requirement (3105 - Curfew Requirement) 	MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated. The definition of the Electronic Tagging has been correctly added to the Result specifying the Requirement (and NOT to the Result for the Order).
