A Bichard7 Regression Test verifying Result Class calculation (Adjournment With Judgement & Judgement With Final Result) and Trigger generation. A 1st set of (Adjournment with Judgement) Court Hearing results are sent through the CJSE and onto Bichard7. A PNC Update is generated and the results from Court (Adjournment With Judgment) are successfully and automatically added onto the PNC. A 2nd set of (Final Result - Result Code '2065' - Defendant Dead) Court Hearing results are sent through the CJSE and onto Bichard7. The solution recognises that this is a Final Result and calculates the Result Class as Judgment With Final Result. PNC Update is generated and the Court Hearing Results are successfully added automatically onto the PNC. A Pre Update Trigger is also successfully created on the Portal.

Steps

| | | |
|---|--|---|
| 1 | Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details | All Pre-conditions as required in order to execute this test have been met |
| 2 | Court Resulting Simulation - Message 1 (Adjournment With Adjudication): Inject SPI Resulted Case Message via Test Console | SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console |
| 3 | Verify that NO Exception record has been created on the Exception Portal * <ul style="list-style-type: none">for info ASN = 1201ZD0100000448750E | NO Exception record has been created on the Exception Portal. |
| 4 | Verify that NO Trigger record has been created on the Exception Portal * <ul style="list-style-type: none">for info ASN = 1201ZD0100000448750E | NO Trigger record has been created on the Exception Portal. |
| 5 | Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated correctly. | MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated correctly. |
| 6 | Court Resulting Simulation - Message 2 (Judgment With Final Result): Inject SPI Resulted Case Message via Test Console | SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console |
| 7 | Verify that NO Exception record has been created on the Exception Portal * <ul style="list-style-type: none">for info ASN = 1201ZD0100000448750E | NO Exception record has been created on the Exception Portal. |
| 8 | Verify that a Trigger record has been created on the Exception Portal * with the following values: Trigger ID = TRPR0007 Trigger Message = Defendant dead - update death marker <ul style="list-style-type: none">for info ASN = 1201ZD0100000448750E | Trigger record has been created on the Exception Portal with the values defined. |
| 9 | Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated correctly. | MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated correctly. |
