Test Description :

A Bichard7 Regression Test verifying Court Results automation of Adjourned Sine Die results where no Conviction Date is received from Court. Court Hearing results are sent through the CJSE and onto Bichard7 containing Adjourned Sine Die results where no Conviction Date has been set/specified by the Court. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution. The Bichard7 solution recognises that no Conviction Date is present and therefore sets the Conviction Date to be the same value as the Date of the Hearing.

The Court Hearing Results are successfully added automatically onto the PNC.
