## 03/06/2021

Test Description:

A Bichard7 Regression Test verifying Offence Matching and Result Text/PNC Disposal Text handling. Court Hearing Results are received from Magistrates Court where:

- Identical Offences are present
- The Results include Result Text that ISNT used to generate PNC Disposal Text
- The Result Text for each Identical Offence is DIFFERENT

Whilst the Results from Court are technically different the Bichard7 solution determines that the updates will essentially be the same, i.e. the differences in Result Text are immaterial since they will not form part of the update to the PNC.

Therefore NO Exception is generated and instead the Results from Court are successfully and automatically added to the PNC. No PRE or POST Update Triggers are created on the Portal either.
