Test Description:

A Bichard7 Regression Test verifying Crown Court Remand handling where the Next Hearing details are only present in the ResultText.Court Hearing results are sent through the CJSE and onto Bichard7 containing a Remand (Adjournment With Judgement). However, the NextHearingDetails element contains no Next Hearing details. The solution recognises that these details (Date, Time and Location) are all present in the ResultText and the update to the PNC is generated based on this information instead.

Successul update of the PNC is made.
