Test Description:

A Bichard7 Regression Test verifying Result Code Qualifier to Bail Conditions translation: Court Hearing Results (Bail and Result Qualifier) are sent through the CJSE and onto Bichard7 containing results for a non-recordable offence that is already on the PNC and for a Stop Listed Offence that was Added In Court.

A Pre Update Trigger is created for the non recordable Offence only.

In addition the record appears in the Bail Conditions Report only for the non recordable Offence.

The PNC is successfully updated with the results from Court for the non recordable Offence. The Offence Added In Court is ignored by the solution since it is a Stop Listed Offence.
