### **Test Case Description**

Test Procedure ID: 210 BR7 R5.4-RCD550-Undated Restraining Order-3047

Test Phase :

· System Integration Testing

Test Type:

· Regression Testing

Test Items verified :

- · Bichard7 application
- · Message Brokering
- · Portal Services (Strategic Portal Framework)
- · Identity & Access Services (Tivoli)

Test Design Techniques used:

- · Specification-based (black box) techniques
- · Experience-based techniques exploratory Testing

External Entities (to which Bichard7 interfaces) verified:

- ·(2.2.2) Ell's forwarding of Court Hearing Result messages received from LIBRA
- ·(2.2.4) NSPIS-PNC Interface Implementation in PNC
- ·(2.2.6) User's web browser

Business Information Flows (those that cross the System boundary) verified :

- ·(2.3.2) Magistrates Court Hearing Concluded
- ·(2.3.5) Arrest/Summons-based Enquiry Request
- ·(2.3.6) Arrest/Summons-based Enquiry Response
- ·(2.3.7) Arrest/Summons-based Update (Message) Request
- · (2.3.8) Arrest/Summons-based Update (Message) Response
- $\cdot$  (2.3.10) Court Result or PNC Update Exception/Trigger List Request
- ·(2.3.11) Court Result or PNC Update Exception/Trigger List Response
- ·(2.3.12) Court Result or PNC Update Exception/Trigger Request
- ·(2.3.13) Court Result or PNC Update Exception/Trigger Response

## Test Description:

A Bichard7 Regression Test verifying Undated Restaining Order handling, Court Results automation and Trigger generation. Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution.

PNC Update is generated including Restraining Order details (Result Code '3047') and the Court Hearing Results are successfully and automatically added onto the PNC. The update to the PNC is verified to ensure the PNC Disposal Text states only "until further order". Pre Update Triggers are also successfully created on the Portal.

#### Steps

Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record\*

All Pre-conditions as required in order to execute this test have been

Court Resulting Simulation: Inject SPI Resulted Case Message via Test Console

\*See Host9 Screen shots folder for PNC tool details

SPI Resulted Case Message is successfully injected into the CJSE check via Test Console

Verify that NO EXCEPTION record has been created on the Exception Portal

NO EXCEPTION record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts

Verify that the Trigger records have been created and that the

Trigger records have been created on the Exception Portal with the Text defined.

associated text has been revised as per below:

Trigger Message = Order Issues - Update Wanted/Missing, check and amend Disposal

Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been correctly updated as follows

#### Offence 1:

For Result Code 3047 the ResultText should be as follows:

- UNTIL FURTHER ORDER \*

Trigger ID = TRPR0003

• RCD553 removed 3047 from the list of Result Codes which would prevent a Disposal Date value from being included in the update to the PNC. As a result the value "UNTIL FURTHER ORDER" should be sent as the Disposal Text to the PNC since there is no Date value that has been provided in the results from Magistrates Court (this is an 'undated' Restraining Order) AND the Result Text received from Court contains the text "until further order".

Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 application.

PNC Print reflects the results sent from the Courts.
