Test Description:

A Bichard7 Regression Test verifying Court Results automation of Bail Granted but then Appealed by the Prosecution at the same Court Hearing. Court Hearing results are sent through the CJSE and onto Bichard7 containing a Remand (i.e. Bail Conditions in the Result) but an Appeal by the Prosecution which

is granted and the Defendant is subsequently Remanded into Custody. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution.

The Court Hearing Results are successfully added automatically onto the PNC.
