Test Description :

A Bichard7 Regression Test verifying Ignored Offences handling where the Offences are present on the PNC and the Results received from Court are in the Stop List. Specifically:- Message 1: All Ignored Offences - Results received are in the Stop List

No PNC Update is generated and No Exception or Trigger is created. The solution recognises the Results received as being in the Result Codes Stop List and the Results are purposely ignored. Verification is made that this processing has been logged to the database (into the General Event Log).
