Test Case Description

Test Procedure ID : 182 BR7 R5.3-RCD496 - No HO100332 for offences added in court

Test Phase :

· System Integration Testing

Test Type :

· Regression Testing

Test Items verified :

· Bichard7 application
· Message Brokering
· Portal Services (Strategic Portal Framework)
· Identity & Access Services (Tivoli)

Test Design Techniques used :

· Specification-based (black box) techniques
· Experience-based techniques - exploratory Testing

External Entities (to which Bichard7 interfaces) verified :

· (2.2.2) EII's forwarding of Court Hearing Result messages received from LIBRA
· (2.2.4) NSPIS-PNC Interface Implementation in PNC
· (2.2.6) User's web browser

Business Information Flows (those that cross the System boundary) verified :

· (2.3.2) Magistrates Court Hearing Concluded
· (2.3.5) Arrest/Summons-based Enquiry Request
· (2.3.6) Arrest/Summons-based Enquiry Response
· (2.3.7) Arrest/Summons-based Update (Message) Request
· (2.3.8) Arrest/Summons-based Update (Message) Response
· (2.3.10) Court Result or PNC Update Exception/Trigger List Request
· (2.3.11) Court Result or PNC Update Exception/Trigger List Response
· (2.3.12) Court Result or PNC Update Exception/Trigger Request
· (2.3.13) Court Result or PNC Update Exception/Trigger Response

System Control Flows (those that cross the System boundary) verified :

· N/A

Business Scenarios verified :

· N/A
Documents Referenced :

· BR7TEST001 Bichard 7 Test Approach v1.3.doc
· MoJ ICT BR7 TTMNNN SIT Test Traceability Matrix-Bichard7 Release N.N *· MoJ ICT Bichard7 SIT Regression Pack Coverage Matrix vN.NN *

- Refer to most recent incarnation/version of this document

Test Procedure originally based on :

· N/A

Pre-requisites :

· Release Note has been provided by IBM
· BR7 Release has been deployed as per the 'Release Note for Bichard 7 vn.n.doc'
· Tests , (smoke test 001) & (smoke test 002) have been successfully run to completion

Historical :

N/A

Test Description :

A Bichard7 Regression Test verifying multiple CCR Group Results automation where Offences are Added In Court and should not be added to the PNC.
Specifically:The following Results are received from Court for an Impending Prosecution Record comprising 3 CCR Groups
- Message 1: All Offences for CCR Groups 1 & 2 = Judgement With Final Result, Offence also Added In Court
The solution recognises that the Offence Added In Court is in the DoNotAddToPNCCategory and is therefore stripped from the update to the PNC.
PNC Update is generated and the Court Hearing Results are successfully and automatically added onto the PNC.
Pre Update Triggers are created on the Portal.

Access Management

FAT (Steria pre Prod)
RDP (From Orwell User Bastion): WS002 mmm.nnn.8.12

IP Address: 51.231.160.183

Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Verify that the following properties files and associated property values have been configured as part of the BR7 solution: applicationResources.properties new properties/values: • br7.error.HO100332=Offences match more than one CCR • br7.error.HO200124=The PNC cannot be updated automatically because there are adjudications together with existing final results. It will have to be done manually.	Properties file and new/revised associated property values have been configured as specified.
3	Court Resulting Simulation: Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
4	Verify that the following Exception record has NOT been created on the Exception Portal Exception ID: HO100332 Exception Text: Offences match more than one CCR ** ** In this instance the BR7 solution does not need to know which CCR Group the Offences added in Court should be assigned to as the offence added in court is in the 'Do not add to PNC' category, hence no need to generate an Exception for manual resolution.	No Exception record has been created as specified on the Exception Portal for the Court Hearing Results
5	Verify that PRE UPDATE Trigger records have been created on the Exception Portal * with the following values: • Trigger ID = TRPR0006 (x 1) • Trigger Message = Defendant imprisoned - update custody history	Trigger records have been created on the Exception Portal with the values defined.
6	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been updated* *The offence added in court: CT03514: Fine Increase. has not been applied to the PNC update as it is in the 'Do not add to PNC' category	Impending Prosecution Record on PNC has been updated with Court Hearing Results passed on from the Bichard 7 solution.
