Test Description :

A Bichard7 Regression Test verifying Offences Added in Court behaviour as follows:Current PNC Status = Adjudication exists
Existing Offences are resulted as: Adjournment Post Judgement
An Offence Added in Court is resulted as: Judgement With Final Result
The Offence Added in Court cannot be added to the PNC so a Trigger is generated instead. The PNC is otherwise successfully updated with Court Hearing Results.

Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation (2 x Messages): Inject SPI Resulted Case Messages via Test Console sequentially (Part 1 followed by Part 2)	SPI Resulted Case Messages are successfully injected into the CJSE - check via Test Console
3	Verify that NO Exception record has been created on the Exception Portal * • ASN = 1101ZD0100000445117G	NO Exception record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts to PNC
4	Verify that a Trigger record has been created on the Exception Portal with the following values: * Trigger ID = TRPS0011 x 1 Trigger Message = Offence added at court - add to PNC • ASN = 1101ZD0100000445117G	Trigger record has been created on the Exception Portal with the values defined.
5	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record has been correctly updated 1x Adjournment Post Judgement	Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 solution. The Offence Added in Court was not part of the update to the PNC and is therefore not on the PNC.PNC Print reflects the results sent from the B7 solution.
