Test Description :

A Bichard7 Regression Test which verifies Warrant Results (Undated) where Offences are Added In Court that are also Adjourned Sine Die at the same time.
Court Hearing Results containing an Undated Warrant for an existing Offence are sent through the CJSE and onto Bichard7. The Results from Court also include Offences Added In Court, which are Adjourned Sine Die.
Hearing Outcome XML is successfully created based on ResultedCaseMessage contents.
The PNC is successfully updated with the Warrant (Remand) details.
The Offences Added In Court cannot be added to the PNC at this point but instead Post Update Triggers are generated to indicate the additional work required to add this information manually onto the PNC.
Pre Update Triggers are also generated.
