Test Description :

A Bichard7 Regression Test verifying Orphaned Non-Recordable Offence handling. Court Hearing results are sent through the CJSE and onto Bichard7 withdrawing the 1st of 2x Offences. The remaining (Non-Recordable) Offence is Remanded. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution. PNC Update is generated and the Court Hearing Results are successfully added automatically onto the PNC.
A second, Court Hearing result is sent through the CJSE and onto Bichard7. The solution recognises the Non-Recordable Offence as present on the PNC and successfully adds the results automatically onto the PNC.
