Test Description :

A Bichard7 Regression Test verifying 'Breach of Bail' Trigger generation where the Defendant Admits the charge of Breaching existing Bail Conditions.The PNC already holds details of an existing Offence with which the Defendant is being charged and the Offence has currently been Remanded (Adjournment Pre Judgement).
The Defendant is then charged with Breaching Bail Conditions (BA76005) and the results for this Offence (Added In Court) are sent from Court at the same time as the results for the existing Offence. The Defendant 'Admits' the new Charge and the results from Court include this information; namely no Verdict is sent since the Defendant has already admitted the Offence.
Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents. The Offence Added In Court is ignored by the solution since it is a Non-Recordable Offence.
The existing Offence on the PNC is successfully updated and Pre Update Triggers are created including the Breach of Bail Trigger to alert PNC Resulters to the additional Offence heard at the Court Hearing.
