Test Description :

A Bichard7 Regression Test verifying Ignored Offences handling (Ignored Offences with Recordable Results) where the Ignored Offence is Added In Court.
Specifically:- Message 1: Offence 1 (Recordable Offence, Stop List Result), Offence 2 Added In Court (Ignored Offence, Recordable Result) = Judgement With Final Result
An Exception is created since the Offence on the PNC has a Stop Listed Result, leaving the only remaining Offence to match being the Offence Added In Court - which doesn't match the Offence on the PNC.
Pre Update Triggers are created on the Portal - this includes a Trigger (TRPR0006) for the Recordable Results received against the Ignored Offence.
