Test Case Description

Test Procedure ID : 278 BR7-R5.8-RCD628 - Breach Plus Other Offences Admits Plea No Verdict

Test Phase :

· System Integration Testing

Test Type :

· Regression Testing

Test Items verified :

· Bichard7 application
· Message Brokering
· Portal Services (Strategic Portal Framework)
· Identity & Access Services (Tivoli)

Test Design Techniques used :

· Specification-based (black box) techniques

External Entities (to which Bichard7 interfaces) verified :
· (2.2.2) EII's forwarding of Court Hearing Result messages received from LIBRA
· (2.2.4) NSPIS-PNC Interface Implementation in PNC
· (2.2.6) User's web browser

Business Information Flows (those that cross the System boundary) verified :

· (2.3.2) Magistrates Court Hearing Concluded
· (2.3.5) Arrest/Summons-based Enquiry Request
· (2.3.6) Arrest/Summons-based Enquiry Response
· (2.3.7) Arrest/Summons-based Update (Message) Request
· (2.3.8) Arrest/Summons-based Update (Message) Response
· (2.3.10) Court Result or PNC Update Exception/Trigger List Request
· (2.3.11) Court Result or PNC Update Exception/Trigger List Response

System Control Flows (those that cross the System boundary) verified :

· N/A

Business Scenarios verified :

· N/A

Documents Referenced :

· BR7TEST001 Bichard 7 Test Approach v1.3.doc
· MoJ ICT BR7 TTMNNN SIT Test Traceability Matrix-Bichard7 Release N.N *· MoJ ICT Bichard7 SIT Regression Pack Coverage Matrix vN.NN *

- Refer to most recent incarnation/version of this document

Test Procedure originally based on :

· N/A

Pre-requisites :

· Tests (smoke test 000), (smoke test 001) & (smoke test 002) have been successfully run to completion

Historical :

N/A

Test Description :

A Bichard7 Regression Test which verifies various Result Classes with a Plea of Admits and no Conviction Date for a Breach Case.Court Hearing Results for existing Offences - one of which is a Breach Offence - are sent through the CJSE and onto Bichard7.
The Breach Remand Results from Court include a Plea of Admits and no Adjudication details.
The other Offences are found Guilty and are also Adjourned to the same Hearing.
Hearing Outcome XML is successfully created based on ResultedCaseMessage contents.
The PNC is successfully updated with the Remand details.
Pre Update Triggers are also generated.
A 2nd set of Court Hearing Results are sent through the CJSE and onto Bichard7.
The Breach Remand Results from Court include a Plea of Admits and no Adjudication details.
The other Offences are also Adjourned to the same Hearing.
Hearing Outcome XML is successfully created based on ResultedCaseMessage contents.
The PNC is successfully updated with the Remand details.
Pre Update Triggers are also generated.
A final set of Court Hearing Results are sent through the CJSE and onto Bichard7.
The Breach Sentence Results from Court include a Plea of Admits and no Adjudication details.
The other Offences are also Sentenced at the same Hearing.
Hearing Outcome XML is successfully created based on ResultedCaseMessage contents.
The PNC is successfully updated with the Sentencing details.
Pre Update Triggers are also generated.

Steps

1	Pre-conditions for this test have been met: New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record* *See Host9 Screen shots folder for PNC tool details	All Pre-conditions as required in order to execute this test have been met
2	Court Resulting Simulation - Message 1 (Breach + Other Offences First Adjournment): Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
3	Verify that NO record has been created on the Exception Portal	NO record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts to PNC
4	Verify that the following Trigger records have been created on the Exception Portal * with the following values: Trigger ID = TRPR0010 x 1 (Case level Trigger) Trigger Description: Bail conditions imposed/varied/cancelled - update remand screen • For info ASN = 1301ZD0100000449641X	Trigger records have been created on the Exception Portal with the values defined.
5	Verify that the Offences have been designated Result Classes as follows: * Offence CJ03510 Result Class = Adjournment Pre Judgement Offence TH68006 Result Class = Adjournment With Judgement • For info ASN = 1301ZD0100000449641X	Result Classes have been designated for the Offences as specified.
6	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record * has been updated ** as follows: • The Breach (1x Remand) details have successfully been added to the PNC.- NO Conviction has been applied to the PNC for the Breach Offence *** • The Other Offence (same Remand and an Adjudication) details have successfully been added to the PNC.	Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 application. PNC Print reflects the results sent from the Courts.

- For info ASN = 1301ZD0100000449641X
  ** This update should generate 2x CCR Group References (i.e. one for the Convicted Offence and one for the Impending Offence). This is important since the 3rd Message in this Test will not work otherwise (the 3rd Message requires the generation of both SENDEF and DISARR and these cannot be combined to update the same CCR Group).

*** Up to R5.7.2 the solution would auto-populate the update to the PNC with a Conviction Date where only a Plea of 'Admits' was received (since the Result Class was always set to Adjournment With Judgment where a Remand was received). This is no longer the case and only Remand details will be present on the PNC for the Breach Offence.

7	Court Resulting Simulation - Message 2 (Breach + Other Offences Second Adjournment): Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
8	Verify that NO record has been created on the Exception Portal	NO record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts to PNC
9	Verify that the following Trigger records have been created on the Exception Portal * with the following values: Trigger ID = TRPR0010 x 1 (Case level Trigger) Trigger Short Name = Conditional bailTrigger Name = Bail conditions imposed/varied/cancelled - update remand screen • For info ASN = 1301ZD0100000449641X	Trigger records have been created on the Exception Portal with the values defined.
10	Verify that the Offences have been designated Result Classes as follows: * Offence CJ03510 Result Class = Adjournment Pre Judgement Offence TH68006 Result Class = Adjournment Post Judgement • For info ASN = 1301ZD0100000449641X	Result Classes have been designated for the Offences as specified.
11	Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record * has been updated as follows: 1x Remand The Breach (Remand) details have successfully been added to the PNC.- The Other Offence (same Remand) details have successfully been added to the PNC. • For info ASN = 1301ZD0100000449641X	Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 application. PNC Print reflects the results sent from the Courts.
12	Court Resulting Simulation - Message 3 (Breach + Other Offences Sentencing): Inject SPI Resulted Case Message via Test Console	SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console
13	Verify that NO record has been created on the Exception Portal	NO record has been created on the Exception Portal to reflect this successful automated transfer of results from the Courts to PNC
14	Verify that the following Trigger records have been created on the Exception Portal * with the following values: Trigger ID = TRPR0020 x 1 (Offence level Trigger) Trigger Short Name = BreachTrigger Name = Update original case with conviction and sentence details • For info ASN = 1301ZD0100000449641X	Trigger records have been created on the Exception Portal with the values defined.
15	Verify that the Offences have been designated Result Classes as follows: *	Result Classes have been designated for the Offences as specified.

Offence CJ03510 Result Class = Judgement With Final Result
Offence TH68006 Result Class = Sentence

- For info ASN = 1301ZD0100000449641X

---

16   Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record * has been updated as follows:

The Breach (Sentence) details have successfully been added to the PNC: ORDER VARIED

The Other Offence (Sentence) details have successfully been added to the PNC: FINE 200.00

- For info ASN = 1301ZD0100000449641X

Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 application. PNC Print reflects the results sent from the Courts.

16   Verify using the MTU PNC Test Tool (via a PNC Print request) that the Impending Prosecution Record * has been updated as follows:

Impending Prosecution Record on PNC has been updated correctly with Court Hearing Results passed on from the Bichard 7 application. PNC Print reflects the results sent from the Courts.
