Test Description :

A Bichard7 Regression Test verifying Result Class calculation and Exception creation. Specifically:Court Hearing Results are received finding the Defendant Guilty. An Adjudication is imposed ("Guilty") but no Conviction Date is provided. The solution creates an Exception indicating manual resolution is required since an automated update to the PNC cannot be generated without a Date of Conviction. The Result Class for the Offence/Result combination without the Date of Conviction is set to "Unresulted".
