Test Description :

A Bichard7 Regression Test verifying Bail Condition handling and Results (Adjournment Pre Judgement) automation.Court Hearing results are sent through the CJSE and onto Bichard7. Hearing Outcome XML is successfully created based on ResultedCaseMessage contents, successful queried response from PNC and also from static data tables held within the Exchange-hosted solution. The solution recognises that Bail Conditions are present in the Results from Court and ensures the 'padding' of each Bail Condition such that no words will be broken over 2x lines when the details are added onto the PNC. PNC Update is generated and the Court Hearing Results are successfully added automatically onto the PNC. Verification is made that no words with the Bail Conditions on PNC are broken over 2x lines. Pre Update Triggers are also generated.

Steps

1   Pre-conditions for this test have been met:
New Case Message has been 'Sent to PNC' creating the Impending Prosecution Record*
*See Host9 Screen shots folder for PNC tool details

     All Pre-conditions as required in order to execute this test have been met

2   Court Resulting Simulation:
Inject SPI Resulted Case Message via Test Console

     SPI Resulted Case Message is successfully injected into the CJSE - check via Test Console

3   Verify that No Exception record has been created on the Exception Portal

     Exception record has not been created on the Exception Portal

4   Verify that the following Trigger records have been created:

Trigger ID = TRPR0010
Trigger Message = 1 x Bail conditions imposed/varied/cancelled - update remand screen

     Trigger records have been created for the case as specified

5   Verify against that the Impending Prosecution Record has been updated on PNC as follows:

1st Bail Condition:
Give to the court any passport hels and the left shoe
2nd Bail Condition:
from each pair of shoes owned by yourself andyour imediate family.
should you own a pair of slippers these will be burned
3nd Bail Condition: (due to RCD456)
Two this bail conditionis over two hundred characters and should not be padded with spaces atthe first oppotunity before the fifity character point as that would lose more of the bail
4th Bail Condition: (due to RCD456)
condition more of the bail condition more of the bail cend

Bail Condition text is now 'padded' at the nearest space to the 50 char line limit - no words are now split over two lines.
RCD456 = create a new bail condition when exceeding the 200 char point.

     Impending Prosecution Record on PNC has been updated with Court Hearing Results passed on from the Bichard 7 application.
